Investigator Narrative

Decedent: RODRIGUEZ, Antonio
Case Number: 2017-02148
Investigator: Rebecca Lorenzana

First Call Information:

On Thursday, July 06, 2017, about 1819 hours, Sergeant Buckhout of the Alameda County Sheriff's Office-Santa Rita Jail called and reported the homicide of 27 year old male, Antonio Rodriguez. Rodriguez was discovered unresponsive in his cell, Housing Unit 9, cell C-10. Paramedics were summoned and Rodriguez was pronounced deceased at 1717 hours, after life saving efforts failed. There was evidence that indicated Rodriguez was possibly strangled by his cellmate, due to discoloration around Rodriguez' neck.

Rodriguez' cellmate later admitted to detectives that he had gotten into a physical altercation with Rodriguez resulting in Rodriguez being choked unconscious. (RL1702)

Medical Summary:

Rodriguez' medical history was unknown and did not appear related to his death.

Rodriguez had slight bruising to his neck, his right shoulder, and right hand where the wrist and front of the hand meet. There was also bruising to his elbows. There was bruising on the right side of his upper lip. (RL1702)

Description of the Death/ Injury Scene:

Rodriguez was pronounced deceased in his cell, Housing Unit 9, cell C-10, at the Santa Rita Jail, located at 5325 Broder Boulevard, Dublin, CA.

Body Identification:

I identified Rodriguez by photo comparison to the photograph associated with Person File Number [REDACTED] issued to Antonio Rodriguez. The photograph and physical characteristics were a match to the decedent.

I showed Rodriguez' booking photo to his mother, [REDACTED] and she confirmed the photograph was of her son, Antonio Rodriguez. (RL1702)

The Alameda County Sheriff's Office-Central Identification Bureau (CIB) in Oakland conducted a fingerprint analysis of the fingerprints associated with the decedent, Rodriguez, Antonio (case #2017-02148) and the fingerprints associated with Rodriguez, Antonio; Personal File Number (PFN) [REDACTED]

Alameda County Sheriff's Office
Gregory J. Ahern, Sheriff / Coroner
Coroner's Bureau, 2901 Peralta Oaks Ct.,
Oakland, CA 94605
(510) 382-3000 / (510) 382-3033 (fax)

birth date February 17, 1990. The fingerprints were identified to have been made by the same subject. (DD863)

Next of Kin Investigation:

Rodriguez was never married and had no children. His legal next of kin was his mother, [REDACTED]. I notified [REDACTED] in person at her residence. I explained the Coroner's Bureau involvement as well as the next of kin's responsibility to contact a mortuary to remove the decedent from the Coroner's Bureau. [REDACTED] said she understood. (RL1702)

Other Agency Reports:

Rodriguez' death occurred within the Alameda County Sheriff's Office's jurisdiction. Detective R. Lopez #1592 was assigned to investigate and report 17-011699 was issued. (RL1702)

Property and Evidence:

I issued Coroner's receipt 38273 for Rodriguez, clothing, and toiletries he had in property at the Santa Rita Jail. (RL1702)

Coroners Fees:

The only applicable fees are the body preparation fees of \$67. Rodriguez was considered an innocent victim based on the manner in which he died. Therefore, removal fees did not apply. The fees were paid in full on July 18, 2017, by Fuller Funeral Home. Accounting receipt 8738 was issued by Administrative Assistant G. Mejorado to document the payment. A copy of the receipt was added to the case file. (RL1702)

Investigative Details:

On Thursday, July 6, 2017, about 2050 hours, Deputy Beezley and I (Lorenzana) arrived at Santa Rita Jail to make the removal of Rodriguez. We went to Housing Unit 9 and were met by Detective R. Lopez, who was inside Rodriguez' cell, C-10. Detective Lopez directed us to Rodriguez who was lying face up in the cell. Rodriguez' head faced the affixed bunk bed and his legs faced toward the cell door. His legs extended out in front of him. Rodriguez' left arm was along his side and his hand was in a closed loose fist. The left hand rested on his abdomen and was also in a loose fist.

Rodriguez wore green and white striped jail issued pants and a brown t-shirt. The shirt had been cut down the middle by medical personnel during resuscitative efforts. Rodriguez had medical therapy in place such as a defibrillator pad on his chest and there was a plastic piece in his mouth between his front teeth. Some of the used medical therapy had been removed prior to our arrival and put in the garbage can outside the cell.

Dr. Ferenc arrived shortly after my arrival and we examined Rodriguez together. The lighting was limited and it was difficult to see clearly, but according to Dr. Ferenc, there was some discoloration to Rodriguez' neck but he could not tell for sure if Rodriguez had been strangled. There were no petechiae

Alameda County Sheriff's Office
Gregory J. Ahern, Sheriff / Coroner
Coroner's Bureau, 2901 Peralta Oaks Ct.,
Oakland, CA 94605
(510) 382-3000 / (510) 382-3033 (fax)

hemorrhages seen in Rodriguez' eyes. Tache Noire (post mortem changes in the eyes after death) was present in both eyes. Livor mortis was present on his back and appeared consistent with his position. It did blanch when we applied pressure to it. Rodriguez was warm to the touch. Rigor mortis was present in the extremities and did break with firm pressure. There was livor mortis along the front of his neck and collar bone area. There was a pinkish red discoloration to the hyoid bone area and a small scratch and abrasion on the right side of the neck. Rodriguez had very long fingernails and none of them were broken. The right pinky nail appeared slightly bruised on the outer corner of the nail where it connects to the skin.

The cell itself was a two inmate cell, which consisted of a bunk bed affixed to the wall. There was also an affixed steel toilet and sink. The cell was messy and unkempt. There was long dark colored hair scattered about the cell. It appeared to have belonged to Rodriguez. There was old food and garbage in the cell. The cell's walls had hand drawn occult like images on them. Deputy Beezley took photos of the scene and we prepared Rodriguez for transport to the Coroner's Bureau. Prior to our departure, I issued Coroner's receipt 38273 for Rodriguez and his clothing, and property he had at Santa Rita Jail. I provided Lieutenant Delbridge and Detective Lopez a copy.

At 2250 hours, we arrived to the Coroner's Bureau and processed Rodriguez into the morgue, which included intake photos. The photos were later downloaded onto a disk and added to the case file. I measured Rodriguez to be 69 inches tall and he weighed 135 lbs. He had black hair and brown eyes. With better lighting, I saw Rodriguez did have slight bruising to his neck, his right shoulder, and right hand where the wrist and front of the hand meet. There was also bruising to his elbows. There was bruising inside his upper lip on the right side. I called Detective Lopez and informed her of the noted injuries to Rodriguez. (RL1702)

On July 7, 2017, Dr. Ferenc performed a complete autopsy on Rodriguez and deferred his cause of death for toxicology results. (RL1702)

On July 17, 2017, Central Valley Toxicology performed a complete drug screen on the femoral blood sample obtained from Rodriguez during his autopsy. The screen revealed there were no common acidic, neutral or basic drugs detected. There was no ethyl alcohol detected. A copy of the report was added to the case file. (RL1702)

On July 25, 2017, Dr. Ferenc determined Rodriguez' cause of death was due to manual strangulation. Scalp contusion was listed as another significant condition. (RL1702)

On August 1, 2017, Dr. Ferenc's histological examination of muscle and soft tissue from Rodriguez' scalp contusion and neck hemorrhage, showed acute hemorrhage and no evidence of inflammatory response. (RL1702)

Findings:

On September 8, 2017, I reviewed this case to establish a manner in Rodriguez' death and to prepare this case for closure. Upon review of the case file and cause of death as given by Dr. Ferenc, I determined the manner was a homicide. Investigators of the Alameda County Sheriff's Office interviewed the suspect

Oakland, CA 94605
(510) 382-3000 / (510) 382-3033 (fax)

and were able to obtain a confession to where the suspect admitted to manually strangling Rodriguez during a physical altercation. (RL1702)

Supervisor Review:

On Thursday, September 14, 2017, I (Sgt. Gonzalgo) reviewed this case and found it to be complete. I concur with the findings and approve this case for closure. (NLG5228)

DATE: July 7, 2017
FROM: Michael Joseph Ferenc, M.D.
TO: Case File 2017-02148
SUBJECT: AUTOPSY PROTOCOL

An autopsy was performed on the body of Antonio Rodriguez at the Coroner's Bureau, 2901 Peralta Oaks Court, Oakland, California, on July 7, 2017, at about 9:00 a.m.

FINDINGS

- 1) INJURIES
 - A. LEFT TEMPORAL SCALP CONTUSION
 - B. RIGHT ANTERIOR-LATERAL NECK ABRASION AND CONTUSION
 - C. FOCAL CONTUSIONS IN RIGHT STERNOCLEIDMASTOID MUSCLE
 - D. SMALL RIGHT THYROID CARTILAGE SUPERIOR HORN CONTUSION
 - E. MINOR EXTERNAL BLUNT INJURIES TO LIMBS AND TORSO
 - F. NO SIGNIFICANT INTERNAL CRANIAL OR TORSO INJURIES.
- 2) TOXICOLOGY IS NON-CONTRIBUTORY (CVT-17-7112).

CAUSE OF DEATH: MANUAL STRANGULATION.

Other condition: SCALP CONTUSION.

cc: District Attorney

Sheriff-Coroner
Alameda County

Body of ANTONIO RODRIGUEZ

1 CIRCUMSTANCES OF DEATH

2 This 27 year-old gentleman was an inmate (PFN BGQ428) on
3 the behavioral health unit at the Santa Rita Jail. He was found
4 supine unresponsive on the floor of his cell partially covered
5 with a blanket. The cell door was open, and his roommate was
6 not present in the cell when he was found. He was pronounced
7 dead at the scene despite resuscitative measures. Minor
8 external trauma was seen most notably injuries on the right side
9 of his neck. At the time of autopsy, the law enforcement
10 investigation is still ongoing.

11 His past medical history included schizophreniform disorder
12 and past substance abuse. His current medications included
13 haldol, olanzapine, sertraline, and zyprexa.

14 PRELIMINARY EXAMINATION

15 The decedent is first cursorily examined at the scene of
16 death on 07/06/2017 at about 2100 hours. The scene is a two-
17 occupant small prison cell on a behavioral health unit at the
18 Santa Rita Jail. The decedent is a young thin man lying supine
19 of the floor of the cell with much of his clothing cut away and
20 evidence of medical resuscitation seen. Minor external injuries
21 are seen most notably faint contusions and abrasions on the
22 right side of his neck. No petechiae are appreciated in the

Sheriff-Coroner
Alameda County

Body of ANTONIO RODRIGUEZ

23 conjunctivae or gingivae. Rigor is slight to moderate. Livor
24 mortis is posterior, is moderate, and still blanches. The torso
25 and limbs are still warm to the touch.

26 Preliminary examination on 07/07/2017 shows the unembalmed
27 body of young man on a mortuary table. He is partially dressed
28 in green-stripped pajama-type pants and grey socks. A properly
29 labeled identification tag is on the right ankle. A plastic bag
30 of other clothing items is with the body. A cut-away brown tee
31 shirt is beneath him. A prison-type medical ID band is on his
32 left wrist.

33 Paper bags are on the hands. Fingernail clippings are
34 taken. Pulled head hair is taken.

35 RECENT INJURIES

36 Injuries to the head and neck: No external injuries to the
37 head are seen.

38 Reflection of the scalp shows an about 1-1/2 x 1/2 inch,
39 1/8 to 1/4 inch thick, dark red-blue contusion to the soft
40 tissue and muscle in the left temporal area.

41 No skull fractures and no intracranial injuries are seen.

42 The external neck is unremarkable except for a faint, red,
43 about 1/2 x 1/4 inch contusion on the anterior-right surface.
44 Above this is a linear, roughly transversely-oriented, 3/8 x

Sheriff-Coroner
Alameda County

Body of ANTONIO RODRIGUEZ

45 1/16 inch, red abrasion.

46 Internally, along the right sternocleidomastoid muscle is
47 two, red-blue, 1/4 to 3/8 inch contusions. At the base of the
48 intact, right superior horn of the thyroid cartilage in the soft
49 tissue and muscle is an about 1/8 inch, red-blue contusion.

50 No other evidence of injuries or hemorrhage is seen in the
51 anterior neck structures. A posterior neck incision does not
52 reveal any hemorrhage in the subcutaneous tissue or muscle.

53 Injuries to the torso: On the right upper back is a 5/8
54 inch red abrasion. Faint linear marking in the abrasion matches
55 the fabric weave pattern of the decedent's tee shirt.

56 No other external injuries to the torso are identified.

57 No internal injuries to the torso are identified.

58 Injuries to the limbs: On top of the right shoulder is a 1-
59 1/2 x 1 inch red-blue contusion and 3/4 inch red-brown abrasion.
60 On the lateral right elbow is a 1-1/4 inch red contusion and
61 a 1/8 inch red-brown abrasion. On the back and inside of the
62 right elbow is a 1-1/2 inch patch of red-blue contusions. On
63 the inside of the right upper arm is a very faint, 1 inch blue
64 contusion. On the back of the right wrist is a 1-1/2 x 1 inch
65 faint red-blue contusion.

Sheriff-Coroner
Alameda County

Body of ANTONIO RODRIGUEZ

66 In the subcutaneous tissue under the top of the left
67 shoulder is a 1/2 inch red-blue contusion. On the anterior left
68 wrist is a linear, 1/4 inch red abrasion. On the back of the
69 left wrist is a 1/8 inch purple-red contusion.

70 A 1/4 inch red-brown abrasion is on the right knee.

71 No other injuries to the limbs, including to limb fractures
72 on palpation and range of motion, are identified.

73 The injuries and findings described above are not repeated.

74 EXTERNAL EXAMINATION

75 The body of a well-developed, thin, medium-complexion,
76 young man is reported to be 27 years, 69 inches, and 135 pounds.
77 Rigor mortis is moderate. Livor mortis is moderate, posterior,
78 red blue, and fixed.

79 The head shows no significant scars. The hair is black
80 with rare grey, straight, and over 12 inches. A sparse
81 moustache and a chin beard are surrounded by beard stubble. The
82 eyelids, sclerae, and conjunctivae show no hemorrhages. Focal
83 brown scleral drying is seen. The eyes are brown. The pupils
84 are roughly round and equal. The nose shows no significant
85 lesions. The mouth is otherwise unremarkable. An oral airway
86 is present. The teeth are in fair condition. The ears are
87 intact.

Sheriff-Coroner
Alameda County

Body of ANTONIO RODRIGUEZ

88 The neck shows no significant scars. The chest shows no
89 significant scars. The breasts are of a man. The abdomen shows
90 no significant trauma or scars. Cardioversion pads are on the
91 torso. The genitalia are of a circumcised man.

92 The arms and forearms show no significant scars. The
93 hands, fingers, and fingernails are intact. The legs and feet
94 show no significant trauma or scars. An intraosseous catheter
95 is in the left shin.

96 The back shows no significant scars. The anus show no
97 hemorrhages, lesions, or discharge.

98 INTERNAL EXAMINATION

99 BODY WALLS AND CAVITIES: The subumbilical fat pad is about
100 1/2 inch. The subcutaneous and breast tissues show no lesions.
101 The pleural cavities are smooth and glistening, have no
102 significant adhesions, and contain minimal serous liquid. The
103 pericardial sac is intact. The mediastinum is unremarkable.
104 The diaphragm is intact. The peritoneal cavity shows no
105 significant adhesions and contains minimal serous liquid. The
106 major organs are normally positioned.

107 CARDIOVASCULAR SYSTEM: The epicardium is smooth and
108 glistening. The coronary arteries follow a balanced
109 distribution and show no atherosclerosis. A separate conus

Sheriff-Coroner
Alameda County

Body of ANTONIO RODRIGUEZ

110 artery ostium arises from the right coronary cusp. The heart is
111 260 grams. The myocardium is red-brown, normal texture, and
112 uniform. The right ventricular free wall does not show any
113 significant increased fatty tissue or increased fibrous tissue.
114 The left and right ventricles are 1.0 to 1.2 and 0.2 cm,
115 respectively. The chambers are not dilated. The endocardium,
116 chordae, and papillary muscles are intact. The coronary sinus
117 ostium has a full translucent valve. The foramen ovale is
118 closed. The atrioventricular and semilunar valves are normally
119 formed, show no lesions or vegetations, and are appropriate for
120 age. The aorta shows no atherosclerosis. The venae cavae and
121 great vessels show no thrombi or emboli.

122 PULMONARY SYSTEM: The right and left lungs are 350 and 250
123 grams. The lungs are pink to tan to red, moderately well
124 aerated, soft, and uniform with smooth glistening surfaces. The
125 bronchi show no significant lesions. The mucosa is tan. The
126 vessels show no significant thrombi or emboli.

127 HEPATOBILIARY SYSTEM: The liver is normal texture, uniform
128 with a smooth glistening capsule, red brown, and 1140 grams.
129 The biliary tract is intact, and the gallbladder contains about
130 15 mL of thin dark green bile. The pancreas is lobulated,
131 normal texture, without focal lesions, and slightly congested.

Sheriff-Coroner
Alameda County

Body of ANTONIO RODRIGUEZ

132 HEMATOPOIETIC SYSTEM: The spleen is normal texture,
133 uniform with a smooth capsule, dark red, and 150 grams. The
134 thymus gland is unremarkable for age. The lymph nodes are not
135 significantly enlarged and show no lesions. The bone marrow of
136 the ribs and calvarium is unremarkable for age.

137 GASTROINTESTINAL SYSTEM: The oropharynx, esophagus, and
138 stomach show no lesions. The stomach contains about 150 mL of
139 small fragments of bright orange, firm material consistent with
140 minimally digested uncooked carrots. No pills or granular
141 material is seen. The duodenum, jejunum, ileum, and large bowel
142 show no mucosal, mural, or serosal lesions. The mesentery is
143 intact. The appendix is present.

144 GENITOURINARY SYSTEM: The adrenal glands are unremarkable.
145 The renal capsules strip with ease. Each kidney is 110 grams.
146 The cortices are normal thickness, normal texture, uniform, and
147 dark red brown. The calyces and collecting systems are not
148 dilated and show no lesions. The pyramids and papillae are
149 intact. The ureters are patent to the bladder that contains
150 about 150 mL of clear yellow urine. The bladder mucosa and wall
151 are unremarkable. The prostate gland is unremarkable for age.
152 The testes are unremarkable for age.

Sheriff-Coroner
Alameda County

Body of ANTONIO RODRIGUEZ

153 MUSCULOSKELETAL SYSTEM: The muscles show no significant
154 diffuse lesions. The skeleton is well developed and appropriate
155 for age.

156 HEAD AND NERVOUS SYSTEM: The scalp is otherwise
157 unremarkable. The skull shows no fractures. The dura mater and
158 leptomeninges show no significant hemorrhages or lesions. The
159 floor of the skull and dural sinuses are intact. The circle of
160 Willis shows no aneurysms and no significant atherosclerosis.
161 The brain is 1590 grams. The cerebral hemispheres, cerebellum,
162 and brain stem show no significant focal or diffuse lesions.
163 The grey and white matter, deep nuclei, cerebellar folia, and
164 brain stem show no significant diffuse or focal lesions. The
165 pituitary gland is intact.

166 ANTERIOR NECK STRUCTURES: The anterior neck muscles are
167 otherwise unremarkable. The thyroid gland is symmetrical, not
168 enlarged, normal texture, and red brown. The parathyroid glands
169 are not identified. The laryngeal cartilages, cricoid
170 cartilage, and hyoid bone are intact. The cartilages are supple
171 and without discernible calcification. The tracheal, laryngeal
172 and epiglottic mucosa shows no lesions. The mucosa is tan. The
173 tongue shows no hemorrhages on sectioning. The posterior
174 pharynx is not obstructed. The prevertebral fascia is intact.

Sheriff-Coroner
Alameda County

Body of ANTONIO RODRIGUEZ

175 The cervical vertebrae are intact.

176

177 SPECIMENS RETAINED: femoral vein blood, heart blood,
178 urine, vitreous humor, gastric contents, and liver. An expanded
179 toxicology screen is requested.

180 Representative tissue sections are retained in formalin.
181 Sections from the scalp contusion and muscle hemorrhage in the
182 right neck are submitted for processing.

183 OTHER STUDIES: None.

184 Any items of evidence collected are retained for police.

185 (Please refer to separate evidence log for details.)
